**TECHNICAL** 

## UNIVERSITY OF CENTRAL FLORIDA Catering Kitchen & Dishroom, Student Union

ENCOTECH was tasked to convert an existing kitchen space into a high-functioning and smooth-flowing dish cleaning area. The scope of work entailed a full-scale demo of the existing kitchen space, framing of new walls, all new plumbing and the relocation of electrical boxes. The Dishroom addition was designed to match the busy flow of the University's Catering Kitchen, made functional by the professional and clean electrical work.

## TECHNICAL

ENCOTECH has been established upon sound technical principles. With construction cost estimating and controls becoming a primary concern in retail business, clients expect the best value.

As an Engineer, Joe Younes was trained to approach construction and design challenges analytically, anticipating obstacles and predicting the most cost effective outcomes when considering several alternate paths.

Construction costs are controlled with careful planning and disciplined management. By avoiding costly oversights, the ENCOTECH team continues to provide reliability in a very technical business environment.
